Professional Summary

Motivated B.Tech Information Technology student with strong foundations in Data Structures, Algorithms, and backend development. Experienced in building scalable applications, RESTful APIs, and AI-driven systems using Java, Python, and modern development frameworks. Passionate about solving real-world problems through efficient software engineering and intelligent systems.

Education

Sri Krishna College of Engineering and Technology, Coimbatore
Bachelor of Technology – Information Technology
CGPA: 8.00

2023 – 2027

Skills Summary

Programming Languages: Java (17+), Python (3.10+), C++, SQL

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, REST API Design

Frameworks & Libraries: Spring Boot, Pandas, NumPy, TensorFlow, PyTorch

Tools & Technologies: Git, GitHub, Docker, Postman, MySQL Workbench

Development Tools: Visual Studio Code, PyCharm, Jupyter Notebook, Eclipse, Google Colab

Work Experience

Full Stack Web Development Intern

May 2026 – June 2026

Mist Software Solutions Pvt. Ltd.

- Developed responsive web applications using HTML, CSS, and JavaScript.
- Implemented backend functionality using PHP including form validation and authentication modules.
- Designed relational database schemas and performed CRUD operations using MySQL.
- Integrated frontend and backend components to build complete end-to-end web application workflows.
- Improved understanding of scalable application architecture and client-server interactions.

Projects

Agri AI – Multimodal Context-Aware Agricultural Advisory System

(View Source)

- Built a multimodal agricultural advisory system using text, voice, and image inputs.
- Developed a context-aware chat interface for crop guidance and farming queries.
- Integrated speech-to-text and text-to-speech for voice-based accessibility.
- Implemented basic image-based analysis using computer vision techniques.
- Designed a responsive mobile-first UI for seamless real-world usability.

AURA – AI Personal Assistant (Computer Vision & Automation)

(View Source)

- Developed a real-time AI assistant capable of detecting user fatigue using webcam-based eye and face tracking.
- Implemented blink detection and fatigue classification using OpenCV and Haar Cascade models.
- Integrated offline Text-to-Speech to provide interactive voice feedback.
- Automated system actions such as brightness adjustment and music playback based on detected user state.
- Designed a modular Sense-Decide-Act architecture to support future machine learning model integration.

Certifications

- Generative AI Foundations Certificate Program — upGrad in collaboration with Microsoft
- Data Science & Analytics — HP LIFE
- Developing Soft Skills and Personality — NPTEL (Elite Certification)
